

PRODUCT DATA SHEET

250mm DEWALT® Combination Saw

PRODUCT DESCRIPTION

The 250mm Combination Saw is a versatile professional machine designed for accurate and efficient cutting . Its combination-saw configuration is suitable for carpentry, construction, woodworking and general work shop applications.

TECHNICAL SPECIFICATIONS

Parameter	Specification
Product Type	Combination Saw
Blade Diameter	250 mm
Configuration	Table / Combination Saw
Operation	Electric powered
Work Table	Integrated metal work table
Support	Portable support stand
Applications	Wood cutting, carpentry, construction and workshop use

KEY FEATURES

- 250mm blade size provides efficient cutting for professional applications.
- Combination design offers versatile cutting functionality in one machine.
- Robust work table supports stable and controlled cutting operations.
- Portable support frame is suitable for jobsite and workshop use.
- Suitable for carpentry, construction, joinery and general woodworking.

NOTE

This specification sheet is prepared from the supplied product image and stated 250mm blade size. It is not an official manufacturer-issued datasheet. Exact model number, motor power, speed, cutting capacities, dimensions and weight should be verified before formal tender submission.
