

# FLOOR SAW

## FSX800

GERMAN  
TECHNOLOGY 

The WEBX FSX800 Diesel Floor Saw is designed for demanding applications in road construction, renovation, demolition, and repair works. Powered by a reliable 4-cylinder water-cooled diesel engine, it delivers powerful and consistent cutting performance with cutting depths of up to 270 mm and supports saw blades up to 800 mm in diameter.

Its hydrostatic drive provides smooth and precise movement, ensuring an even feed rate during cutting. The ergonomic design, easy steering, and convenient one-hand feed control make the FSX800 comfortable and efficient to operate, even during long working hours.

### Technical Data

|                        |                     |
|------------------------|---------------------|
| Cutting Depth          | 270 mm              |
| Cutting Speed          | 50-75 m/s           |
| Saw Blade Size         | 800 mm              |
| Water Tank Material    | Steel               |
| Water Tank Capacity    | 55 Ltr              |
| Dimensions (L × W × H) | 1300 × 550 × 850 mm |
| Weight                 | 250 kg              |

### Engine Specifications

|                     |                                                                                     |
|---------------------|-------------------------------------------------------------------------------------|
| Engine Brand        | ATLANTA                                                                             |
| Engine Model        | ZS115S                                                                              |
| Engine Type         | Single-Cylinder, Horizontal, 4-Stroke, Direct-Injection, Water-Cooled Diesel Engine |
| Rated Power         | 25 HP                                                                               |
| Start               | Key Start                                                                           |
| Bore × Stroke       | 115 × 115 mm                                                                        |
| Displacement        | 1.195 Ltr                                                                           |
| Cooling System      | Water-Cooled                                                                        |
| Fuel Consumption    | ≤ 244.8 g/kW·h                                                                      |
| Engine Oil          | SAE 40 Diesel Engine Oil                                                            |
| Engine Oil Capacity | Approx. 4 Ltr                                                                       |
